#### 1. Summary of the project:

The SELCO Foundation being carried up of livelihood works, a value chain approach has been undertaken within the Agri/Allied and Non-Agri sectors as a significant amount of energy is required in each stage of the value chains. Access to reliable energy in pre-production, production and post-production processes not only improves the production and brings efficiency across the value chain, but also reduces the detrimental economic and climatic effects of fossil fuels, as most of the available off-grid solutions in the country are fossil fuel powered and are expensive over the lifetime of the equipment. SELCO Foundation has been working towards enabling socio-economic growth in the rural livelihoods sectors by using renewable energy alternatives and developing decentralized renewable energy integrated energy efficient machinery in the technological front.
